

# OpenText™ Brava!™ for Documentum xCP

View | Collaborate | Redact | Publish

Brava!™ for Documentum xCP makes it easy to view documents, CAD drawings and images in virtually any file format, enabling users to collaborate efficiently with markup tools and threaded discussions—critical functionality that helps streamline business workflows and processes. Seamlessly integrated into Documentum xCP, Brava! helps organizations save money (no need to buy multiple software applications and pay for training), increase productivity (quick and precise searches, streamlined collaboration and approval processes) and enhance security (redaction tools remove sensitive content).

## Cross-Platform Viewing and Collaboration

Brava! makes it easy to view and collaborate on content in virtually any file format, including Microsoft® Office documents, PDF files, CAD drawings, image files and more—all from within a zero-footprint, browser-based client. Because Brava! requires only a browser to run on the client—and it is compatible with all major web browsers—it works on PCs, Macs and even the Apple® iPad®. There's no need to purchase multiple software applications or toggle back and forth between interfaces because Brava!'s seamless integration makes it easy to work on documents right from the Documentum xCP environment.

Ideal for collaborative workflows such as review and approval cycles, Brava! lets users comment on and mark up any document or drawing without modifying the source document. Users can add stamps such as APPROVED or CONFIDENTIAL, or import any JPEG, GIF or PNG image. They can also create custom stamps that automatically insert current system information like the user name and date. Users can add and reply to Changemark™ comments, recording an audit trail of both the discussion and the outcome. All comments and markups are saved in a separate XML file.

Brava! is fast, with robust search features that let users quickly find the documents they need. Brava! can search on key phrases within documents to quickly and precisely access related content.

## FEATURES

---

**Universal file viewer:** View and collaborate on files in any format, without the native applications. OpenText Brava! for Documentum xCP offers vector-based viewing, so text and graphics are crisp at tight zoom levels.

**Zero-footprint HTML client:** View, annotate and redact documents within all major web browsers on PCs, Macs and the Apple® iPad®.

**Fast and accurate searches:** Robust search features and thumbnail page views allow fast and precise access to specific content.

**Changemark™ notes:** Step through comments, ensuring no change is missed.

**Easy-to-use redaction tools:** Completely remove sensitive data from documents; don't just hide it.

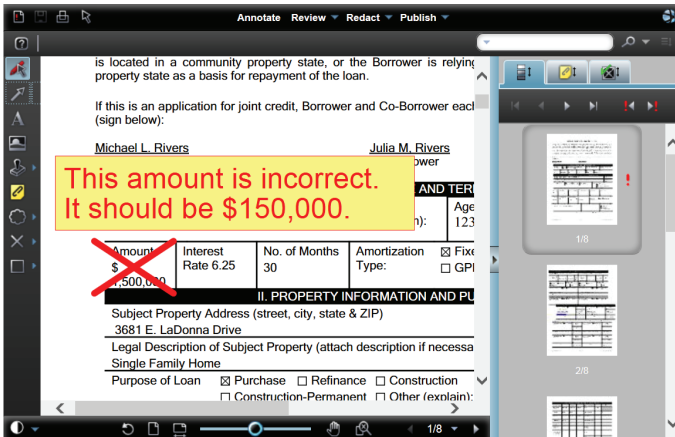

**Watermarks and banners:** Add labels like CONFIDENTIAL or DRAFT to documents and publish them in PDF and TIFF formats. Add stamps with static text or images, or pull in data, such as the current date or the computer's IP address.

## TECHNICAL SPECIFICATIONS

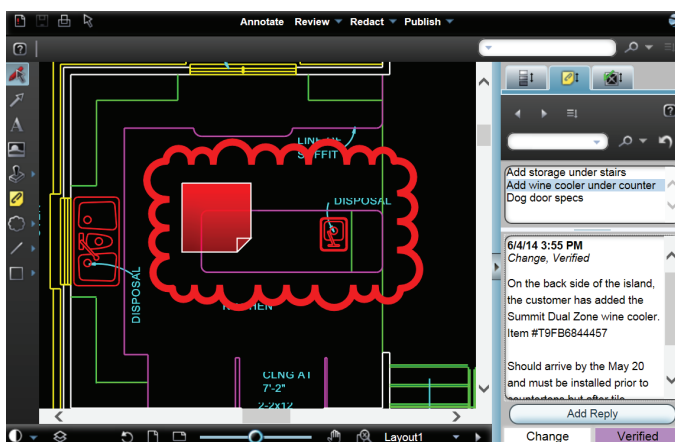

---

Brava! supports virtually all document, image and CAD file formats, including PDF.

The Brava! HTML5 client is compatible with Microsoft® Internet Explorer, Mozilla Firefox®, Google Chrome™ and Apple Safari®.

Use resizable thumbnails to quickly scan complex drawings for the page you need.

Changemark threaded discussions record all comments

### Easy-to-Use Security and Privacy

Brava!'s easy-to-use redaction tools enable removal of sensitive information from documents, drawings and images. Redact sensitive content manually, by intelligent pattern matching and by text search.

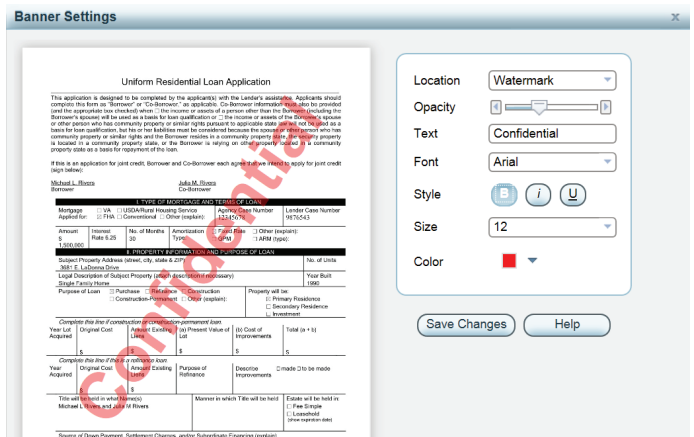

Users can completely remove proprietary information or privacy data from a document—not just hide it—then finalize the redactions to a new PDF or TIFF file. The original file remains untouched in the repository.

### Add electronic signatures

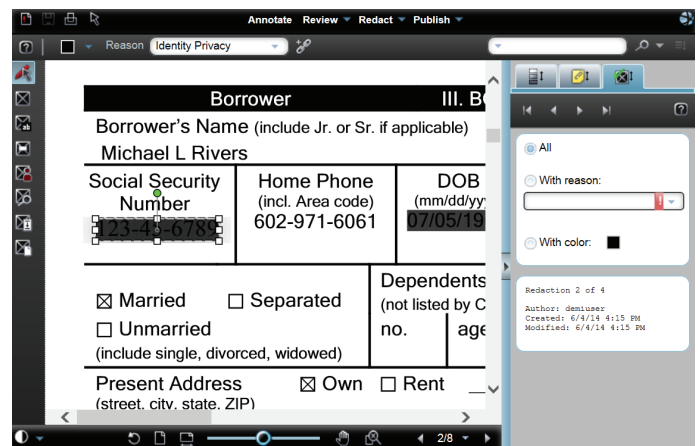

Brava! makes it quick and easy to add an electronic signature and the date. Create a signature mark that embeds the signer's name and title, then add that signature to any document and create a PDF of the signed document.

### Publish documents

Transform any document to PDF, PDF/A, PDF/E or TIFF for archiving or convenient sharing. Burn in markups and even convert Changemark notes to PDF comments to include external resources in a review process. For additional security,

Dynamic stamps update document status, pull in dates and more.

Easy-to-use redaction tool lets you remove privacy data.

Brava! allows you to add watermarks and banners for display on screen and/or on printed documents. These can include predefined labels like CONFIDENTIAL and DRAFT, as well as information such as the user, date and even the IP address of the user's machine.

### Work with CAD drawings

Brava! offers vector-based viewing for CAD geometry and text, delivering crisp lines and sharp, legible views at tight zoom levels. With Brava!, users can turn off layers to simplify the view, change the background color and view block attributes. An easy-to-use zoom window lets users quickly pinpoint specific areas, and pans are smooth and responsive.

### What Our Customers Are Saying

*"With Brava!, what used to take several weeks now takes a day or two."*

*"Brava! has been invaluable for streamlining our document review process. It's very reliable and easy to use."*

*"With Brava!, data is much easier to retrieve and to share with regional offices across the country."*
